

# HTML CSSOULET

---

We are going to build our first website with Thimble!

Thimble is a an online editor with which you can learn to build websites.

- Go to <https://thimble.mozilla.org/>
- Click "start a project from scratch".

## Challenges:

- ☐ Find out what HTML is used for and what CSS is used for
- ☐ Find out what a HTML tag is
- ☐ Try adding an image to the page
- ☐ Make a link to your favourite website
- ☐ Try changing the color of the background of the page
- ☐ Try to centre the some text on your webpage
- ☐ Make a second page on your website and link to it from your first page
- ☐ What is a "class" and what can you use it for?
- ☐ Make the some text of your page change color when you hover over it

Good sources to use:

W3Schools: <https://www.w3schools.com/>

MDN: <https://developer.mozilla.org/>

## When you feel like you got the hang of it :

- Sketch a website idea
- See if you can make your design with HTML / CSS
